Multiple Projects on Clark's Run

- Students participated in the Earth Day field day.
- We (Centre) are still operating an automated water quality monitoring station, and this spring students will be analyzing this data.
- Anna Bushong is working with Mark Galatowitsch on a water quality research project.
- Emma Fillion has started a Bonner (Centre's volunteer and service organization) project working with Malissa.
- Deidre Mohan worked on upstream-downstream nutrient analysis for her Senior Seminar project.
- Isabel Harrison is working on the Herrington Lake Coal Ash Pollution topic from a legal perspective.
- This spring we will be doing even more projects like these.
