

Category	Item	Points	My Score
Water Quality & Conservation	Do you use a rain barrel? Rain barrels are a very useful tool to gather and conserve water to reuse for watering and other lawn care needs.	2	
Lawn Care	Have you tested your soil to determine nutrient needs? Choose a fertilizer type based on the results.	3	
Plant Installation	Take steps to remove invasive species from your property. Identify which species are currently on your property and learn which plant species are invasive in Kentucky. You can remove these invasive species and replace with native plants.	3	
Wildlife	Do you provide water features such as bird baths and ponds? These features help to attract wildlife to your yard and improve their quality of life.	2	
Community/Other	Have you participated in a tree planting event, volunteered with a community garden, or a similar activity? Sustainability is not something we can do alone!	1
